Using your Inventory File Template

Print this page

This page contains information you need to create, validate and upload your inventory file to Amazon. We recommend that you print this page so you can refer to it as you go.

Save a copy of this file as an Excel worksheet on your hard drive. Then proceed to enter your product data into the Template tab, using the guidelines below.

Data Definitions Tab

The Data Definitions tab contains the acceptable values that can be used as you fill out the Template tab. We recommend printing the Data Definitions sheet for reference.

The Data Definitions tab also indicates whether a field is Required or Optional:

Required: Required fields are the minimum attribute values necessary to create your product in the Amazon catalog. Required cells will be highlighted in RED in the template once you have selected a Product Type for that row. Failure to enter a valid value in a required field will prevent your product from being added to the catalog. Additional data may be required, depending on the values you enter elsewhere in this template. (For example, you must provide package dimensions, unit of measure if you provide package length)

Optional: Optional fields give customers product information that is useful, but not critical, when making purchasing decisions. Optional fields will be highlighted in BLUE in the template tab once you have selected a Product Type. We recommend that you provide as much Optional product data as possible for your product. In some cases, fields we have labeled Optional may be important to your product or business, or required according to your seller agreement.

Valid Values and BTGs

As indicated in the Data Definitions tab, some fields require that you use terms from the Valid Values tab. These terms are specific to the product attribute and are used for categorization and product discoverability – for example, via search.

The cell for Item Type Keyword requires that you use a valid value from the Browse Tree Guide (BTG) for the category in which you are listing. BTGs are category-specific and contain the rules that Amazon uses to assign products to categories on our site. These values are available as drop-downs in the Template tab and you can view the mappings for these values in the Browse Data tab.

The BTGs are also available as separate Excel files that can be downloaded from this page: https://sellercentral.amazon.com/gp/help/1641. In it, you will find mappings between Item Type Keywords and Amazon's controlled terms which allow products to be displayed in those categories. In the BTG for your category, find the category most appropriate for your product, and then use the corresponding query to determine what field and value you need to put in your template to place your product in that category.

Image Tab

Refer to the Images tab for Amazon's image standards. Images that you upload to Amazon must conform to these standards.

View full product image requirements here: https://sellercentral.amazon.com/gp/help/1881

For category specific guidelines, download the style guide for your category from the downloadable file template table here: https://sellercentral.amazon.com/gp/help/1641

Example Tab

See the Example tab for an example on how to enter product information. This information is for reference only. In order to avoid including invalid product data in your inventory file, do not work on your own items within the Example sheet.

Template Tab

The Template tab is where you will enter the information for your listings. After selecting the desired Product Type for a row in the template, required fields in that row will be highlighted in RED, while optional fields will be highlighted in BLUE. Attributes that are not applicable to your Product Type will be grayed out in that row. For best results, also submit as much optional data as possible for your products. If you are not providing data for a particular non-required field, leave the cell blank. Feel free to add color, boldface, borders and other formatting (not additional text) to the template if it is helpful to you. Note that high ASCII characters (such as ®, ©) and HTML tags are not allowed.

Save your Inventory File

When you have finished entering your product data into the Template tab, you can save the entire workbook as an Excel file or you can save the Template tab (only) as a Text (tab-delimited) (*.txt) file. (For the Chinese marketplace, save as Unicode Text (*.txt).)

This is your inventory file that you will upload via the Add Products via Upload page in Seller Central.

Submit your Inventory File

Upload your file from the "Check and Upload your Inventory File" section of the Add Products via Upload page in Seller Central, here: https://sellercentral.amazon.com/listing/upload.

When uploading, you can select "Check Your File" before submitting, or skip this step and upload your file immediately. The "Check Your File" option will check your template for common listing errors and will automatically configure variations in your template. It will not add products to your catalog.

When you upload your file, our system will automatically validate your data file as it is submitted. When your submission is complete, you will be able to download a processing report. Any errors in the upload will appear in a Processing Report. This report can be downloaded from the "Monitor Upload Status" section of the Add Products via Upload page in your seller account on Seller Central, here: https://sellercentral.amazon.com/listing/status

Note: We recommend first uploading 15 or fewer products for testing purposes. You can upload the rest of your inventory once you have completed a successful test.

Updated Templates

From time to time, Amazon will update valid values, data validation rules, explanatory text, and requirements. In the event that you submit an outdated template, we will generate an updated version on your behalf with all of your data prepopulated in it. You will see a link to "Download your submission in the updated template version" on the "Monitor Upload Status" section of the Add Products via Upload page on Seller Central.

Still have questions?

If you have read the Instructions or Data Definitions tabs of this file and still have questions, consult seller Help, starting with this page: https://sellercentral.amazon.com/gp/help/581

Image Standards

Every product on Amazon needs one or more product images. Choose images that are clear, straightforward, and easy to understand. They must accurately represent the product and be information-rich and attractively presented. Show only the product that is being offered for sale, with minimal or no propping. Text, logos, and inset images are not allowed. Whenever possible, provide several images, with each one showing different angles and details of the product. This is your opportunity to show your product to your customer, so quality matters.
We reserve the right to reject images that do not meet our image standards.
It is your responsibility to ensure that you have all necessary rights to the images you submit.

MAIN Images

*The background for a MAIN image must be pure white (pure white blends in with the Amazon search and item detail pages, which have RGB values of 255,255,255).
*A MAIN image must not be a graphic or illustration and must not contain accessories that are not being dispatched with the product, props that may confuse the customer, text that is not part of the product, or any logos, watermarks or inset images.
*The product must fill 85% or more of the image.

Additional Images

*MAIN images should be supplemented with additional images showing different sides of a product, the product in use, or details that are not visible in the MAIN image. For media products, this could include the back cover, sample pages, or screenshots. You can add up to eight (8) images.
*A white background is recommended, but not required. Additional images may not include logos or watermarks, and all props or accessories must be presented in a way that will not cause customer confusion.

Image Size

Images should be 1000 pixels or more in either height or width as this will enable the zoom function on the website (zoom has been proven to enhance sales). Files measuring less than 500 pixels on the longest side will be rejected by our system.

Naming and formatting

*Amazon accepts JPEG (.jpg), TIFF (.tif), or GIF (.gif) file formats (JPEG files are preferred as they are smaller in size and can therefore be processed and uploaded more quickly).
*A suggested way to name an image file is to save the image on your web server using the product SKU as the file name followed by the view type or variant code--MAIN, PT01-PT08 (additional images), SWCH (usually a color swatch only used on products with more than one variation).
Examples: 8845013515.MAIN.jpg, 8845013515.PT01.jpg, 8845013515.SWCH.jpg

Uploading your Image files

Once you have named the file and saved it to your web server, enter the URL of the image file in the appropriate cell of your product template.

In addition to this Example tab, please read the Instructions and Data Definitions tabs in this file.

Please note that the following examples are for demonstration purposes only. To create an inventory file, please use the Template tab.

Detailed descriptions of examples in row.	sku
Example 1: This is an example of a single product with only one size and no variations. The product is by default a "child" with no "parent" (sometimes called an "orphan").	03AMZNTRUF01
Note: Column headers in bold indicate the data is required. Note: The product-tax-code for every product offered by an Amazon seller is A_GEN_NOTAX. This is a default value, so if you do not enter it, it will automatically be entered by Amazon.com.	12ABC345DEF
Example 2: This is an example of a "parent" with two "children". The parent (the one listed in the first row of this example) is ***not*** a sellable product; it is a description of a set of products. Note: **don't enter a size, color, count, type, parent sku, relationship type or quantity for the parent product, but *do* enter an image URL.** Do not enter data such as price, time-to-ship, weight, etc., for the parent product, since these are overridden by the child product data. Be sure to put the price, weight, size etc., in the child products, since this will be different for each.	03AMZNTRUF01-P 03AMZNTRUF01-100 03AMZNTRUF01-250

Also note that the bullet points and description are needed for each child product but not for the parent product since parent products do not appear on the site. Note that this example only has child main-image-urls, not swatch-image-urls. In this case, the variation names will be shown and will have a link, but no swatch images will show up next to that link.	123nutbar-P 123nutbar-mintchoc

123nutbar-blkcherry

	123nutbar-carrot
Example 3: This is an example of an accessory relationship between 2 products. In this case, the "parent" is a buyable product; any product information for it can appear on the site. You should only create accessory relationships between child products.	123Soniccare 234Sonicare 156Crest
Example 4: This is an example of a product that varies by 2 dimensions: flavor and size. The Cherry flavor comes in 2	03AMZNTRUF01-P

sizes but the Grape flavor only comes in 1 size.	03AMZNTRUF01-100 03AMZNTRUF01-250 03AMZNTRUF01-255
Example 5: This is an example of how to delete a product.	03AMZNTRUF01

Definition and Use
Within a category there are often multiple product types defined. Selet a product type from the drop down on the template tab or the a value from the valid values tab.
A unique identifier for the product, assigned by the merchant. The SKU must be unique for each product listed. After you have established a SKU for a product, please do not change it without first deleting the original SKU from our systems through a delete feed.
A short title for the product. This will be displayed in bold on the product page and in the title bar of the browser window. Do NOT include the publisher, developer, game platform or operating system in the title – this information will be collected and displayed elsewhere.
Specify the manufacturer for your product
Use this to specify what your item is. This information is required to accurately place your product in appropriate placements throughout our website.
A standard, alphanumeric string that uniquely identifies the product. This could be a GCID (16 alphanumeric characters), UPC or EAN. This is a required field if product_id_type is provided.
The type of standard, unique identifier entered in the Product ID field. This is a required field if Product ID is provided.
Enter the operating system for this software product. Note this field is to be used for Software, Software Games, and PC. In the event that your product can be used by more than one operating system, please look through the full list of valid values, since some are bundled together (see Examples)
The product's version or edition type, if applicable. Note
A price greater than 0. Do not include thousands separators or currency symbols. The item will not be displayed on the site without a standard price.
Merchant-fulfilled products: Enter the quantity of the item you are making available for sale. This is your current INVENTORY commitment. Quantity is required for all child or stand-alone items. If left blank when first submitting the product information, the item will be displayed as Out of stock. Do not enter quantity for parent items.Amazon-fulfilled products: Do not enter quantity, as it is not applicable for products fulfilled by Amazon. Instead, submit fulfillment_center_id in a separate column (see data definition for details).
A numerical entry that indicates the condition of the item. Review the condition guidelines definitions.

The currency code for price data. This is required if map, msrp, item_price, or sale_price is provided. The same currency will apply to all price-related fields.
The URL where a main image of the product is located. Its important that this is supplied for all products.
The URL for additional images of your product.nnThese images will be shown on the detail page when the customer clicks through to see other views associated with the product. For example, you can use this field to show the label information or packaging of your product. Upload additional images with different views to the item, or with some emotional surrounding as additional image.
ated for all your items. Some are required to create an offer.
The brand or developer of the product. See the BTG for valid values.
Specifies the type of operation (Update, PartialUpdate or Delete) to be done on the data provided. If left blank, the default behavior is "Update." Use "Update" to reload all fields. All fields are required when using update. When uploading an Update existing data will be overridden. Use "PartialUpdate" when you want to update only a few specified fields in your file. Only include the SKU(s) and the fields you want to update. Use "Delete" when you wish to remove a product completely and permanently from the catalog.
If applicable, please submit the manufacturer's part number for the product. For most products, this will be identical to the model number; however, some manufacturers distinguish part number from model number.
A text description of the product.
roduct on the site using browse or search
Brief descriptive text, called out via a bullet point, regarding a specific aspect of the product.

Choose terms that describe the intended uses of this product. For example, a hockey stick is used for "hockey." We will use this information to merchandise this product on the Web site. By selecting relevant terms, you increase the chance that buyers will find this product.
Search terms that describe your product: no repetition, no competitor brand names or ASINs.
Choose terms that describe the target audience for this product. ("Target audience" refers to the end user, not the buyer; thus, children's books are for "children," not for the parents who might purchase them.) We will use this information to merchandise this product on the Web site. By selecting relevant terms, you increase the chance that buyers will find this product.
The merchant's catalog number for the product, if different from the SKU.
Choose terms that describe product attributes that are relevant to buyers but that don't describe the product's intended uses, target audience, or subject matter. Examples include: "antique," "portable," "chewable," and "waterproof." We will use this information to merchandise the product on the Web site. By selecting relevant terms, you increase the chance that buyers will find this product.
Choose terms that describe the subject matter of this product. These terms may describe what the product is about (such as a book about "hiking") or what it depicts (such as a poster of a "car"), or may be more general representations (such as trading cards for the "Detroit Lions"). We will use this information to merchandise the product on the Web site. By selecting relevant terms, you increase the chance that buyers will find this product.
Specifies the specific predominant color of the product.
Specifies appropriate Software and Video Game genre.
Only for Platinum Anchor merchants. Indicate your platinum keywords for this item. Child items should only use Platinum Keywords that are also assigned to the associated parent items.
Size Name
yers.
Specifies the manufacturers maximum recommended age.
Indicate the minimum age recommended of the user for this product. This will be used to help buyers find your product. The value can be entered in in months or years.
Specifies computer hardware platform for software related products.
Specifies system requirements.

The unit of measure used to describe the dimensions (width, length, height) of the product, expressed in centimeters, meters, inches, or feet.
The length of the product.
The height of the product.
The width of the product.
The unit of measure used to describe the weight of the product when packaged to ship, expressed in grams, kilograms, ounces, or pounds.
The weight of the product when packaged to ship. This is displayed on the product page and used to calculate shipping costs for weight-based shipping, if available. If you've chosen the weight-based shipping option, you must supply a value in this cell for all of your shippable products.

Images should have 72-pixels-per-inch resolution and be 500 pixels minimum in length (on the longest side). The preferred file format is JPEG (.jpg), and the URL must be fully-formed and valid (i.e., include http://). When naming your image, you may use the following convention (though not required): Product SKU + View Indicator (.main) + File Extension (.jpg). An example would be: "15774.main.jpg". There cannot be any spaces or high ASCII characters in the image url. Save the image to your Web server and supply the URL to the image in this field. Accepted formats are .jpeg, .jpg, and .gif
A valid URL, including leading "http://" The url is case sensitive, so make sure to use matching capitalization and no redirections (e.g. .jpeg instead of .jpg). While a web browser might be smart enough to locate your image despite of these little inaccuracies, our image collection process isn't.

Sodium dimethyldithiocarbamate
Sodium fluoroacetate

Soots, tars, and mineral oils (untreated and mildly treated oils and used engin
Spirodiclofen
Spironolactone
Stanozolol
Sterigmatocystin
Streptomycin sulfate
Streptozocin (streptozotocin)
Streptozotocin (streptozocin)
Strong inorganic acid mists containing sulfuric acid
Styrene
Styrene oxide
Sulfallate
Sulfasalazine (Salicylazosulfapyridine)
Sulfur dioxidee
Sulindac
Talc containing asbestiform fibers
Tamoxifen and its salts
Tamoxifen citrate
Temazepam
Teniposide
Terbacil
Teriparatide
Terrazole
Testosterone and its esters
Testosterone cypionate
Testosterone enanthate
Tetrabromobisphenol A
Tetrachloroethylene (Perchloroethylene)
Tetrachlorvinphos
Tetracycline (internal use)
Tetracycline hydrochloride (internal use)
Tetracyclines (internal use)
Tetrafluoroethylene
Tetranitromethane
Thalidomide
Thioacetamide
Thiodicarb
Thioguanine
Thiophanate methyl
Thiouracil
Thiourea
Thorium dioxide
Titanium dioxide (airborne, unbound particles of respirable size)
Tobacco smoke
Tobacco smoke (primary)
Tobacco, oral use of smokeless products
Tobramycin sulfate
Toluene
Toluene diisocyanate
Topiramate
Toxaphene (Polychlorinated camphenes)
Toxins derived from Fusarium moniliforme (Fusarium verticillioides)
trans-2-[(Dimethylamino)methylimino]-5-[2-(5-nitro-2-furyl)vinyl]-1,3,4-oxa
Treosulfan
Triadimefon

Triamterene
Triazolam
Tributyltin methacrylate
Trichlormethine (Trimustine hydrochloride)
Trichloroacetic acid
Trichloroethylene
Trientine hydrochloride
Triforine
Trilostane
Trimethadione
Trimethyl phosphate
Trimetrexate glucuronate
TRIM RX
Triphenyltin hydroxide
Tris(1,3-dichloro-2-propyl) phosphate (TDCPP)
Tris(1-aziridinyl)phosphine sulfide (Thiotepa)
Tris(2,3-dibromopropyl)phosphate
Tris(2-chloroethyl) phosphate
Trp-P-1 (Tryptophan-P-1)
Trp-P-2 (Tryptophan-P-2)
Trypan blue (commercial grade)
Unleaded gasoline (wholly vaporized)
Uracil mustard
Urethane (Ethyl carbamate)
Urofollitropin
Valproate (Valproic acid)
Vanadium pentoxide (orthorhombic crystalline form)
Vinblastine sulfate
Vinclozolin
Vincristine sulfate
Vinyl bromide
Vinyl chloride
Vinyl cyclohexene dioxide (4-Vinyl-1-cyclohexene diepoxide)
Vinyl fluoride
Vinyl trichloride (1,1,2-Trichloroethane)
Vinylidene chloride (1,1-Dichloroethylene)
Vismodegib
Warfarin
Wood dust
Zalcitabine
Zidovudine (AZT)
Zileuton
α-Methyl styrene (alpha-Methylstyrene)
