FURTHER PARTICULARS

THE SCHOOL

The London School of Hygiene & Tropical Medicine is one of Europe's leading schools of Public Health and a leading postgraduate institution worldwide for research and postgraduate education in global health.

Part of the University of London, the London School is the largest institution of its kind in Europe with a remarkable depth and breadth of expertise encompassing many disciplines. The School was ranked one of the top 3 research institutions in the country in the Times Higher Education's 'table of excellence', which is based on the 2008 Research Assessment Exercise (RAE). In 2009, the School became the first UK institution to win the Gates Award for Global Health.

- The School's environment is a rich multicultural one: there are almost 4000 students from 100+ countries following 22 taught masters courses delivered either in London (~650) or through distance learning (~2700), and undertaking research degree training (~400). Over 40% of these students are from non-European countries. The largest growth has been in distance learning students (>40% over 3 years), though the London-based student population (where accommodation limits growth) is at its highest level ever. Alumni are working in more than 180 countries. The School has about 1500 staff drawn from over 60 nationalities.

- There are research collaborations with over 100 countries throughout the world, utilizing our critical mass of multidisciplinary expertise which includes clinicians, epidemiologists, statisticians, social scientists, economists, molecular biologists, immunologists, ophthalmologists, anthropologists, virologists, pharmacologists and nutritionists. At any one time around 100 School staff are based overseas, particularly in Africa and Asia. We have a strong commitment to partnership with institutions in low and middle income countries to support the development of teaching and research capacity.

- The School has expanded greatly in recent years. Its research funding now exceeds £67M per annum, much of it from highly competitive national and international sources. The commitment of staff to methodological rigour, innovative thinking and policy relevance will ensure that the School continues to occupy a leadership position in national and global health, adapting quickly to new challenges and opportunities.

Mission

To improve health and health equity in the UK and worldwide; working in partnership to achieve excellence in public and global health research, education and translation of knowledge into policy and practice.
