Typical Presentation

PowerPoint 12

Created 03/15/2006

Text Only Slide

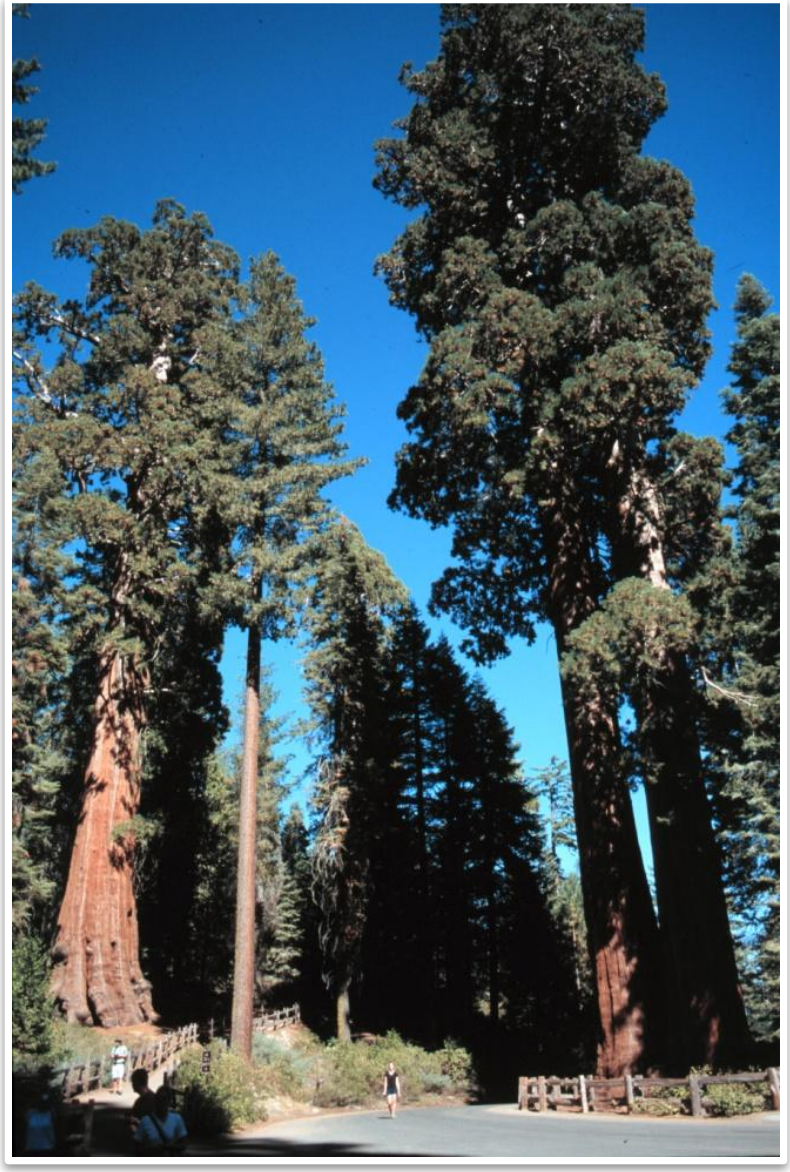

- Many slides created in a typical PowerPoint presentation contain only text
- The percentage of text-only slides has gone down as people use increasing amount of graphics
- The title and bullet layout is one of the most popular layouts used

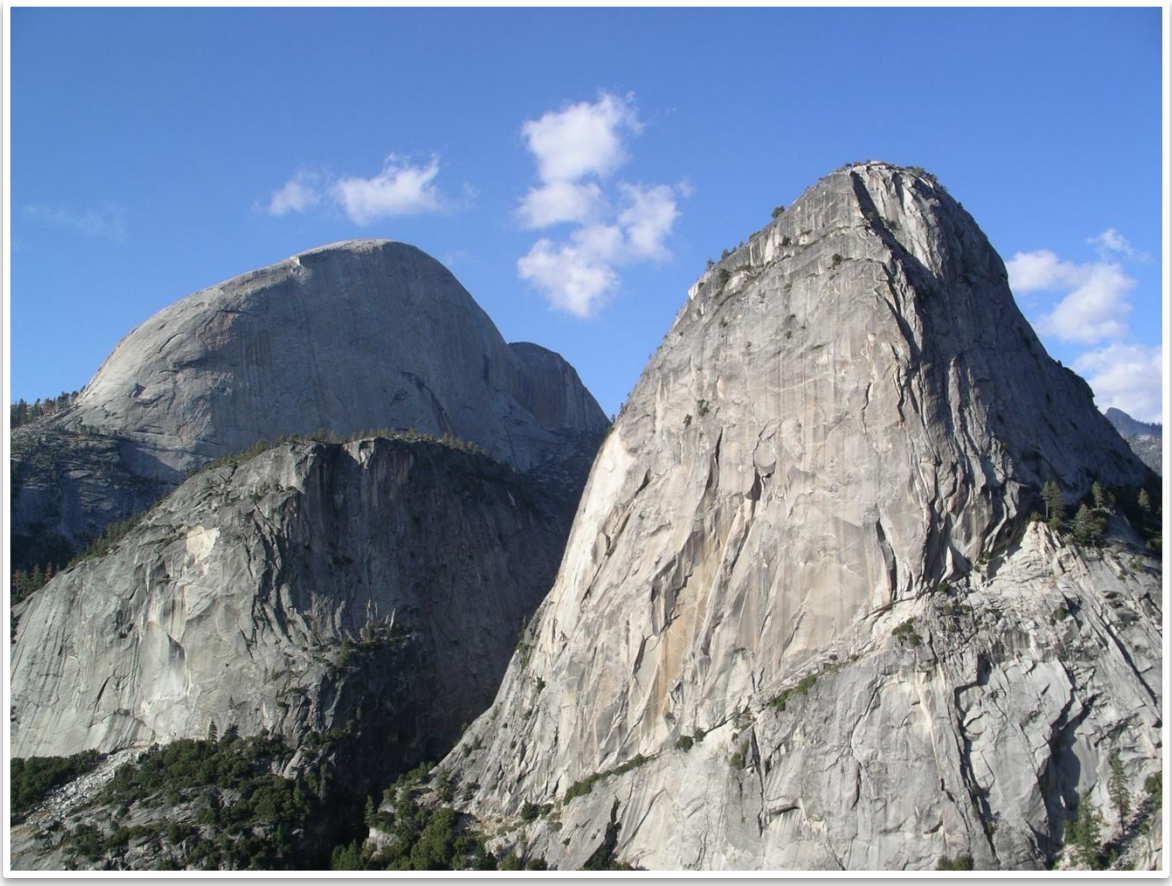

Graphics Usage

- Photographs are extremely common in PowerPoint
- JPEG is by far the most popular image format
- ClipArt is much less popular than it once was

Content With Caption

This is a new layout in Office 12 that lets you insert any kind of content and provide a caption. It looks great with pictures, charts, tables and diagrams

Picture With Caption

Pictures have become incredibly popular in PowerPoint and the rest of Office. Many slides consist of just a picture with a title or a caption and this layout provides a quick, easy way to do that.

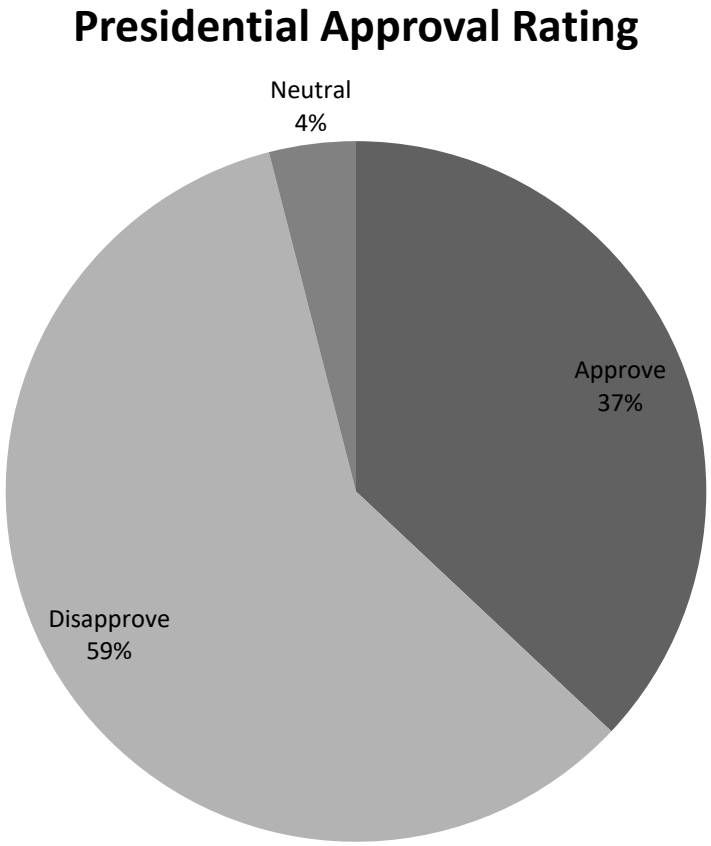

Tables Have Come a Long Way

	Q1	Q2	Q3	Q4
North America	55,000,000	67,000,000	69,000,000	81,000,000
Europe	34,000,000	45,000,000	47,000,000	54,000,000
Asia	29,000,000	35,000,000	32,000,000	30,000,000
Latin America	11,000,000	9,000,000	15,000,000	17,000,000

Chart Usage

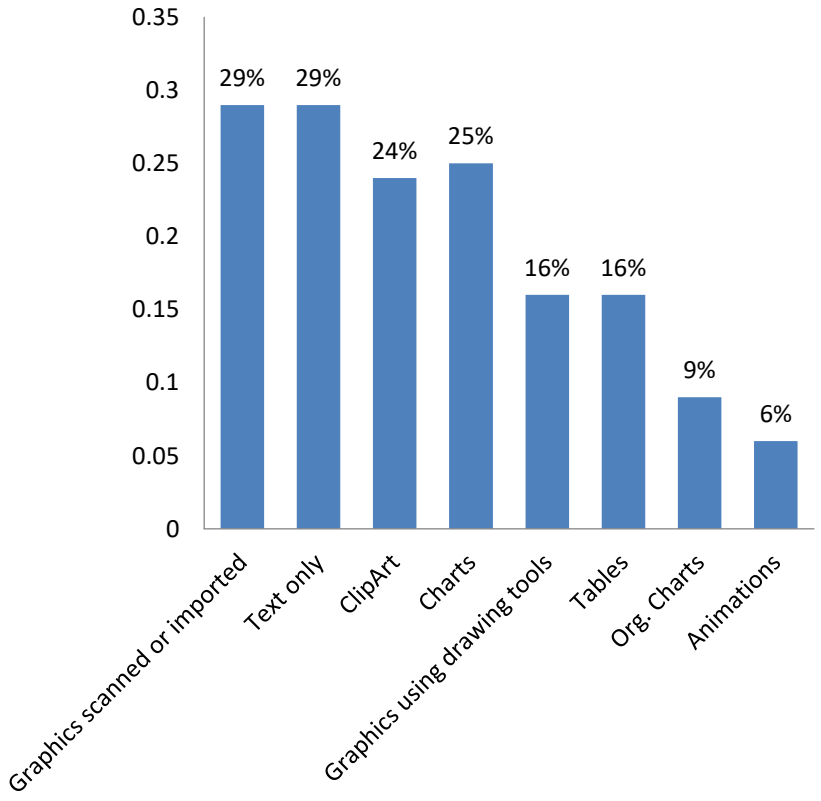

- A lot of people use charts to show data graphically
- Common chart styles include:
  - Bar charts
  - Pie charts

Gallup Poll 03-16-06

Comparing Content 1997 vs. 1995

1997 Study

1995 Study

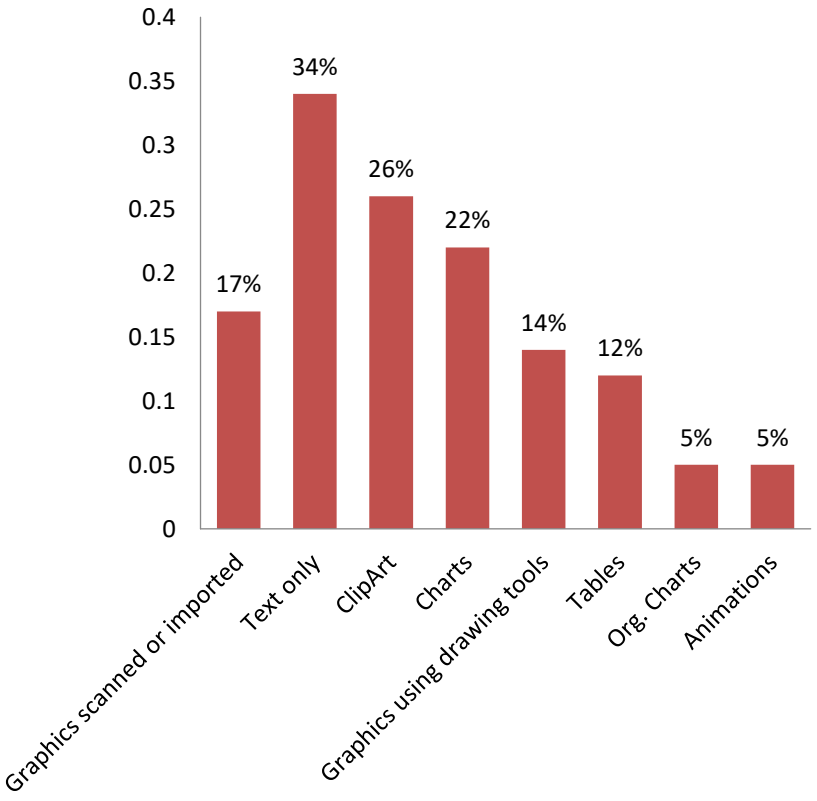

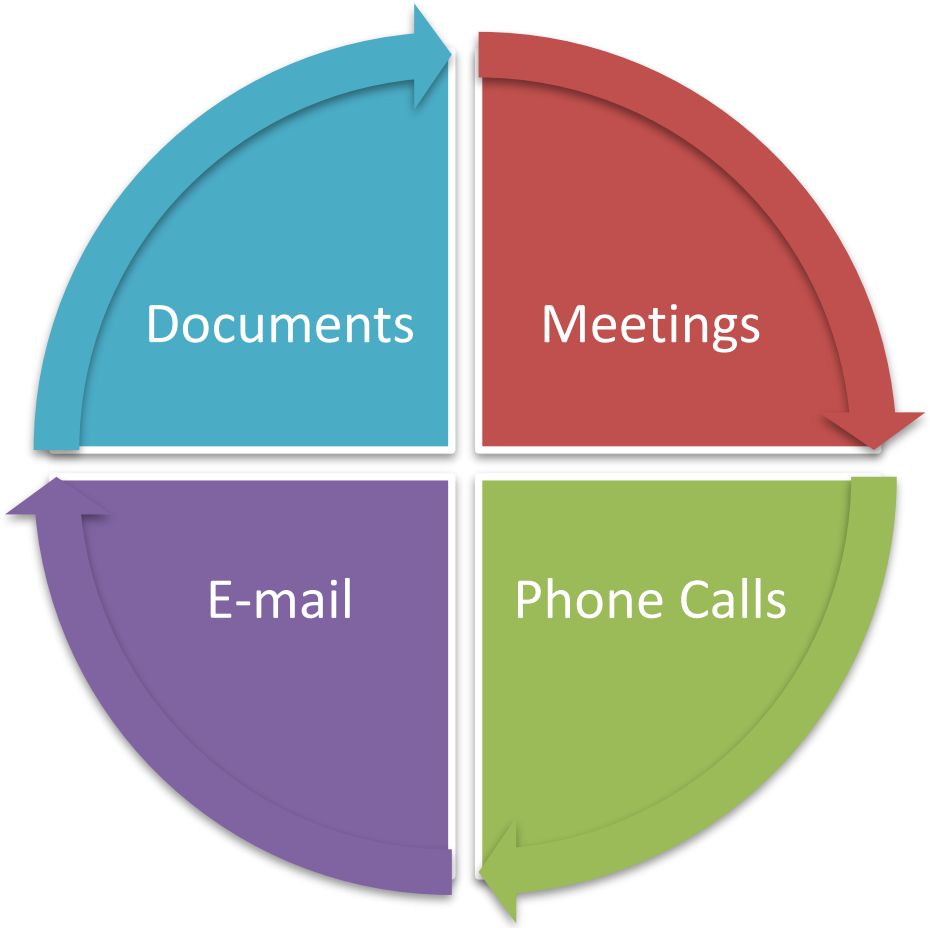

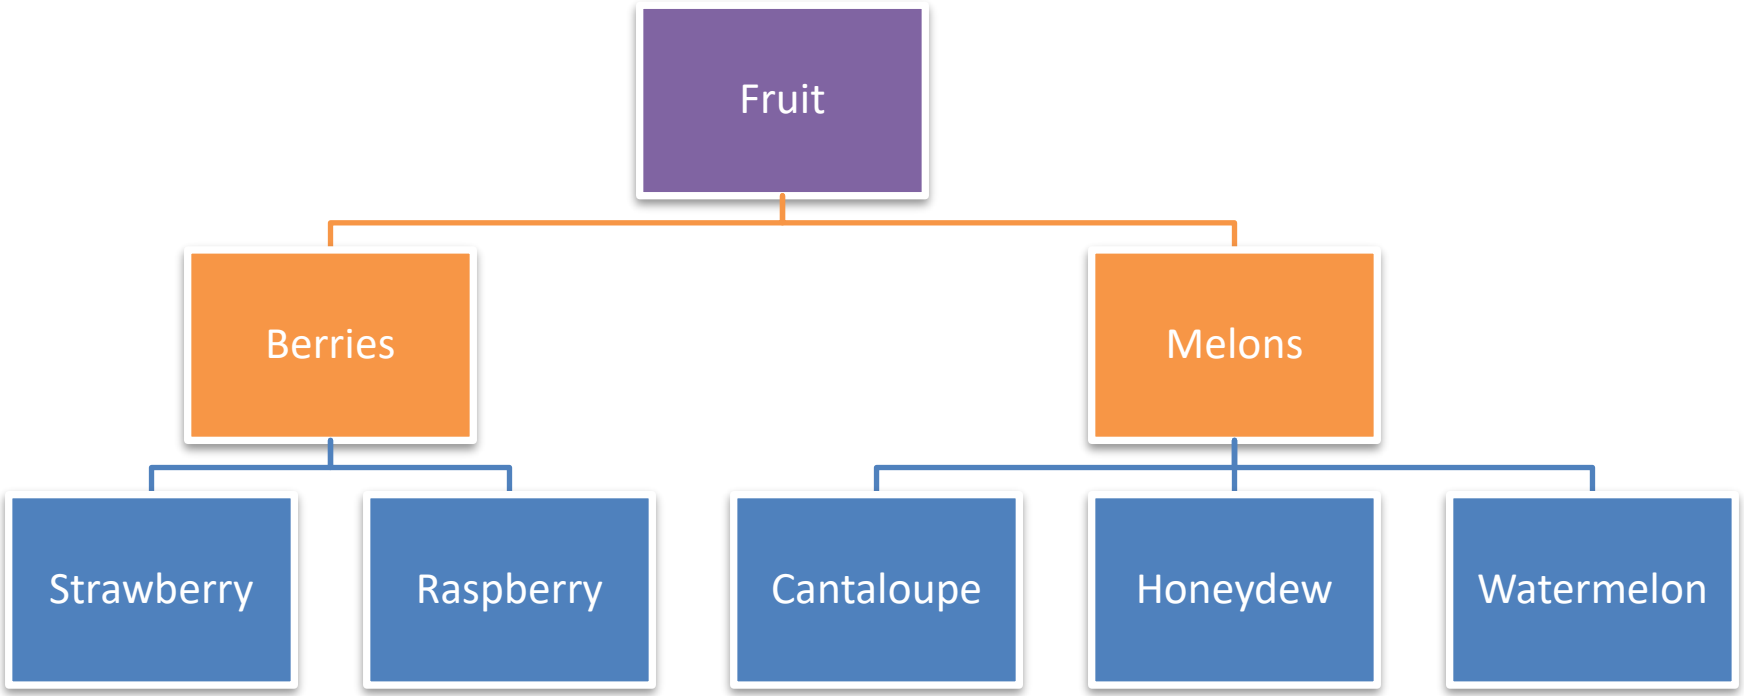

Diagram Usage

- Diagrams effectively illustrate many types of ideas, processes, structures
- Most diagrams in PowerPoint were hand drawn
- Powerful diagramming tools are now built into PowerPoint

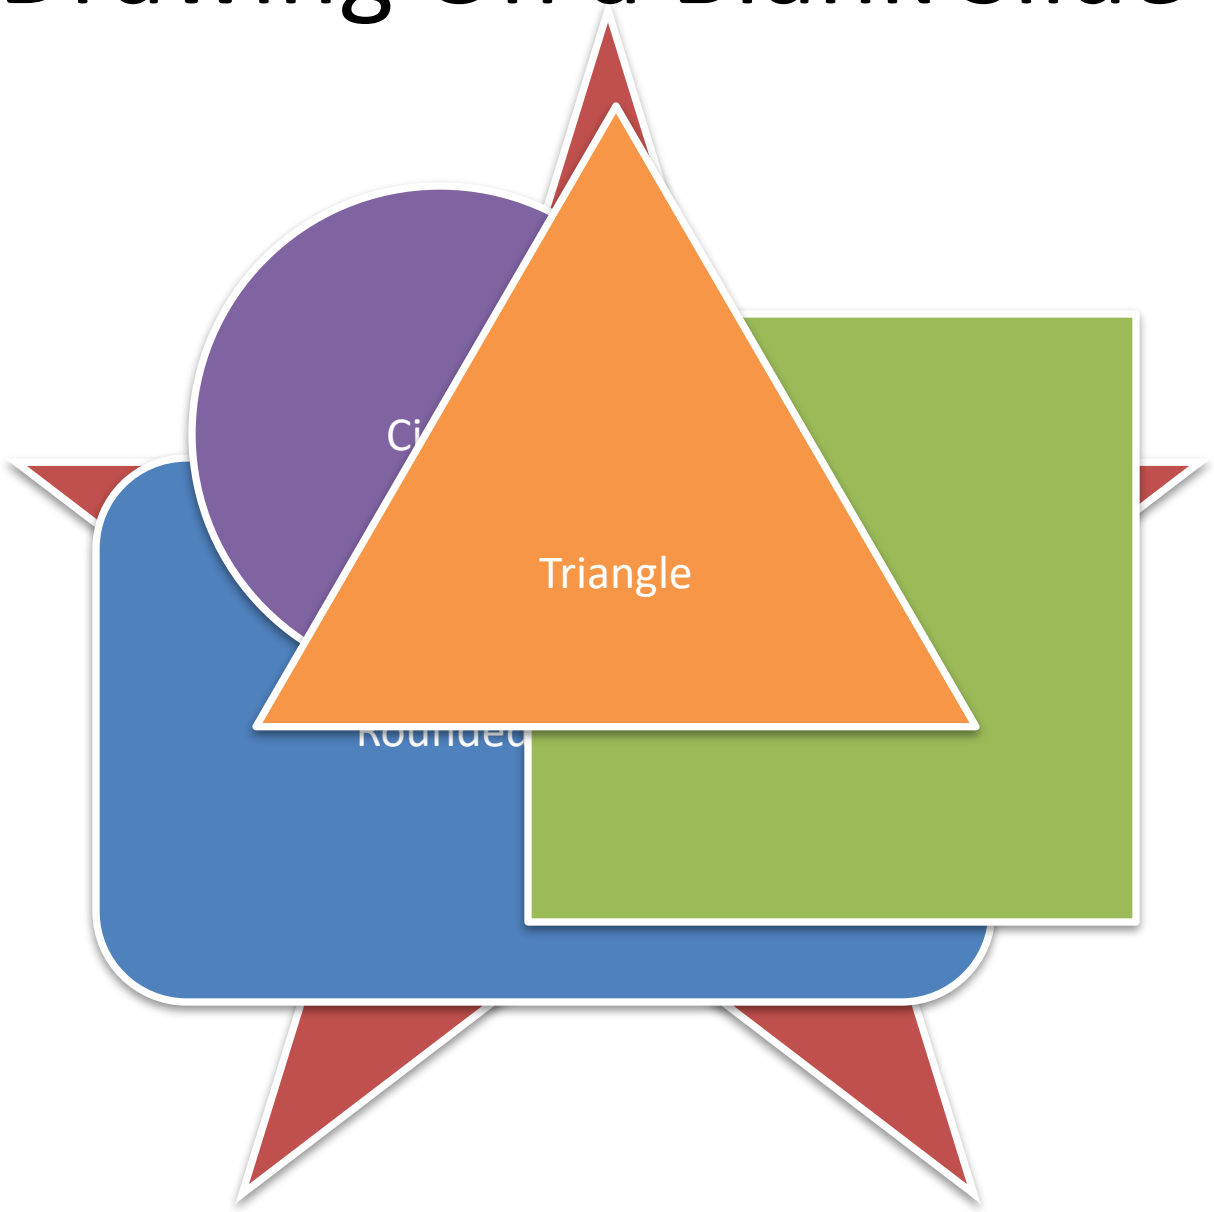

Diagrams Are No Longer Hand Drawn

Org. Charts Are Very Common

Drawing On a Blank Slide

Conclusion

- PowerPoint is used for many different things
- The most common types of content are:
  - Text
  - Pictures
  - Tables
  - Charts
  - Diagrams
  - Drawings
- Richer presentations have sound and video but they are not as common
- This deck contains only the things found in a typical presentation
