Product Name

Title of Presentation

Overview

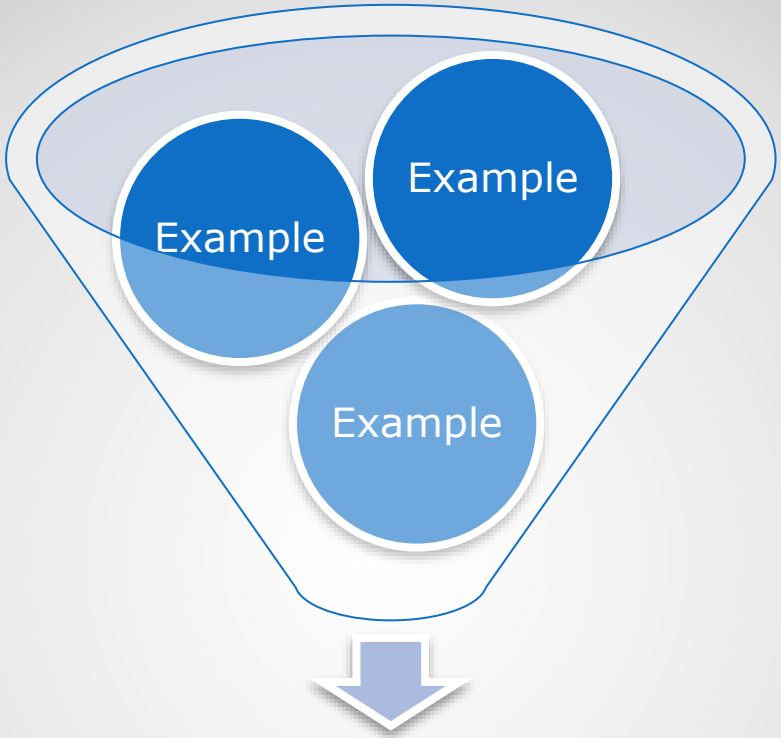

Briefly describe the product or service, the user problems it solves, and the audience for which it is intended

Outline different models available

Features and Benefits

- Use several slides to outline the features of your product
- Group features in logical categories, using one slide per category
- Be sure to state the user benefit of each feature
- Use one slide per model, if appropriate

Discuss how the product or service can be used by different groups, giving real user examples where possible

Applications

Specifications

For products, give relevant technical specifications, using as many slides as necessary

For services, detail the items and conditions under which the service is offered

Detail the product models available and list specific prices for each model and additional options
