Geneva Declaration on the Future of the World Intellectual Property Organization

Humanity faces a global crisis in the governance of knowledge, technology and culture. The crisis is manifest in many ways.

- ✧ Without access to essential medicines, millions suffer and die;
- ✓ Morally repugnant inequality of access to education, knowledge and technology undermines development and social cohesion;
- Anticompetitive practices in the knowledge economy impose enormous costs on consumers and retard innovation;
- ■ Authors, artists and inventors face mounting barriers to follow-on innovation;
- ➢ Concentrated ownership and control of knowledge, technology, biological resources and culture harm development, diversity and democratic institutions;
- ◆ Technological measures designed to enforce intellectual property rights in digital environments threaten core exceptions in copyright laws for disabled persons, libraries, educators, authors and consumers, and undermine privacy and freedom;
- ◆ Key mechanisms to compensate and support creative individuals and communities are unfair to both creative persons and consumers;
- ◆ Private interests misappropriate social and public goods, and lock up the public domain.

Signing the Geneva Declaration on the Future of WIPO ***(as of September 30, 2004)***
