

Quantity Sold	Product	Salesperson
5	Apples	1
4	Apples	2
15	Artichokes	1
3	Artichokes	2
22	Bananas	1
12	Bananas	2
10	Carrots	1
33	Carrots	2
Formula	Description	Result
"=SUMIFS(A2:A9, B2:B9, "A*", C2:C9, 1)"	Adds the total number of products sold that begin with "A" and that were sold by Salesperson 1.	20
"=SUMIFS(A2:A9, B2:B9, "<>Bananas", C2:C9, 1)"	Adds the total number of products (not including Bananas) sold by Salesperson 1.	30

Totals	Account 1	Account 2	Account 3	Account 4
Amount in dollars	100	390	8321	500
Interest paid (2000)	1%	0.50%	3%	4%
Interest paid (2001)	1%	1.30%	2.10%	2%
Interest paid (2002)	0.50%	3%	1%	4%
Formula	Description	Result		
"=SUMIFS(B2:E2, B3:E3, ">3%", B4:E4, ">=2%")"	Total amounts from each bank account where the interest was greater than 3% for the year 2000 and greater than or equal to 2% for the year 2001.	500		
"=SUMIFS(B2:E2, B5:E5, ">=1%", B5:E5, "<=3%", B4:E4, ">1%")"	Total amounts from each bank account where the interest was between 1% and 3% for the year 2002 and greater than 1% for the year 2001.	8711		

Daily Measurements	First Day	Second Day	Third Day	Fourth Day
Rain (total inches)	3.3	0.8	5.5	5.5
Average temperature (degrees)	55	39	39	57.5
Average wind speed (miles per hour)	6.5	19.5	6	6.5
Formula	Description	Result		
"=SUMIFS(B2:E2, B3:E3, ">=40", B4:E4, "<10")"	Adds the total amount of rainfall for days when the average temperature was at least 40 degrees Fahrenheit and the average wind speed was less than 10 miles per hour. Only cells B2 and E2 are summed because, for each column (B through E), the values in both rows 3 and 4 must meet criteria1 and criteria2, respectively. Cells B3 and B4 meet both criteria, as do E3 and E4. However, neither C3 nor C4 meet either criteria. Finally, although D4 meets criteria2, D3 fails to meet criteria1.	8.8		

Morning and Evening Measurements	First Day	Second Day
AM: rain (total inches)	1.3	0
PM: rain (total inches)	2	0.8
AM: average temperature (degrees)	56	44
PM: average temperature (degrees)	54	34
AM: average wind speed (miles per hour)	13	6
PM: average wind speed (miles per hour)	0	33
Formula	Description	Result
"=SUMIFS(B2:E3, B4:E5, ">=40", B6:E7, "<10")"	Adds the total amount of rainfall for 12-hour periods when the average temperature was at least 40 degrees Fahrenheit and the average wind speed was less than 10 miles per hour. Only cells B3, C2, and D2 are summed, because their corresponding cells meet both criteria. The corresponding cells for B3 are B5 and B7, the corresponding cells for C2 are C4 and C6, and the corresponding cells for D2 are D4 and D6. As an example of data excluded from the operation, the corresponding cells of B2 (B4 and B6) do not meet both criteria; specifically, cell B6 fails because its value (13) is greater than criteria2 (10).	3.5

Third Day	Fourth Day
1.5	3
4	2.5
40	38
38	77
8	1
4	12
