

This workbook should be manipulated with Excel only! At least 2013 works.

This workbook is used in unit testing of LibreOffice's OpenCL code.

The two rectangular areas marked with 'a' and 'b' cells at the left and top borders are su

The 'a' one contains formulas that are repeated vertically so that they form formula group in an OpenCL-using instance are calculated using OpenCL kernels.

The 'b' area is a copy of the **values** in the 'a' area. If you add new formulas to test into Rearge the boundary markers as necessary, and make sure they are the same size.

The 'a' and 'b' areas must start in the A column.
