How the Faux SpinButtons were created:

- a. Create a Forms CommandButton or any Shape of your Choice. Remove text from the Shape if needed.
- b. Create an AutoShape Triangle. Fill the triangle with the appropriate color. Rotate the triangle if needed.
- c. Place the triangle inside the CommandButton. Change the shape sizes as required.
- d. Right Click the First Shape and Select Order > Send to Back. This will make sure the Triangle is always visible.
- e. Left Click the First Shape. Press the CTRL key and Left Click the Triangle.
- f. Right Click the Green Circle on the Triangle and Select Grouping > Group.
- g. Rename the Grouped Shape to 'Group1SpinUp' or any name of your choice.
- h. To rename the grouped shape, 'Right Click' the grouped shape. Press ALT F8 to make the Macro menu visible. 'Right Click' the Grouped Shape and Select 'Assign Macro'. 'Double Click' on Group1SpinUpEventHandler or a
- i. Create 'Group1SpinDown' Shape using macro 'Group1SpinDownEventHandler' in a similar manner.

Double Click' on 'RenameActiveShape'.
