MARKETING REPORT UPDATE

The Marketing Report Update tool contains two additional worksheets: **GSH/HPH/LPH**

The GSH, HPH and LPH worksheets summarize referrals and admissions by referral source. Upon opening the tool the user begins by clicking on the date range (to ensure it only includes days with complete data). The data will automatically update. The user should also

ADMISSIONS TABLE

The first table summarizes admissions by referral source for the same month from last year. When looking at a month, the user can see what is expected by the end of the month based on the current data, compares, and the difference in admissions for the

REFERRALS & CONVERSION RATE TABLE

The second table summarizes referrals and conversions. For referrals which is still in progress the user can see an estimate of referrals that have already elapsed. The section comparing current referrals versus last ('Referrals Gap').

*SALES REPRESENTATIVE TABLE**

* Sales representative data is calculated based on the number of referrals supplied by the hospice. If a representative character

The third table summarizes admissions, referrals and conversions

REFERRALS
ADMISSIONS
CONVERSION RATE
ADMISSIONS >60
ADMISSIONS TREND
BUDGETED ADM. *
% TO BUDGET

* Budgeted admissions are pulled directly from the hospice's budget. Budgets have been keyed into the compensation

*HOSPITAL TABLE**

* As new hospitals arise, hospital names change and hospital maintenance. Please contact HealthPivots if changes

The fourth table summarizes admissions, referrals and conversions for a month with average activity for that hospital in a year

DATA SOURCES

The data come directly from Chapter Health System

ctive worksheets.

referrals, admissions and conversion rate data for a single month, even if that month is still in progress. Click 'Refresh' to pull back the most recent available data (NOTE: the tool updates through the prior day to the current day). The user can then select a primary month from the light blue cell in the upper left of the first table. The user can also select two comparison months from the other two light blue cells.

source. In this table the user can compare admissions with two comparison months, as well as with that month which is still in progress the user can see an estimated 'Run Rate' of how many admissions might be expected by the end of the month based on the days that have already elapsed. The section comparing with the prior year will show how this month compares with the prior year versus last ('Admissions Gap').

conversion rate by referral source, comparing with that same month from last year. When looking at a month which is still in progress the user can see an estimated 'Run Rate' of how many referrals might be expected by the end of the month based on the days that have already elapsed. The section comparing with the prior year will show how this month compares, and the difference in referrals for this year versus last ('Referrals Gap').

on the territory name, as supplied by the hospice. Each territory is linked to a named representative, as assigned to a new territory, or a territory name changes please contact HealthPivots.

and conversion rate by sales representative/territory. The table consists of 8 rows of data:

Month to Date Referrals
Month to Date Admissions
Month to Date Conversion Rate
Month to Date Admissions, Excluding Readmissions of Hospice Patients Discharged <60 Days Prior
Estimated Total Admissions for Month
Budgeted Monthly Admissions *
% to Budgeted Monthly Admissions

the compensation system via a live query. If budgets are not listed, check to make sure territory-specific budgets are entered into the system, then refresh the tool to pull those budgets into the table.

, or hospital names are entered differently into the system the pre-determined list may need to be updated. Changes need to be made.

and conversion rate for each hospital in the hospice's service area. The table compares the selected month the user selects (default is prior month) and in that same month one year ago.
