

P&G Raw Material Information Workbook
Version: 2.0
Date: #####

Please Note, macros must be enabled in Excel
(see the "Enabling Macros" worksheet for help with enabling macros)

Formulated Products

Instructions

Step 1 Start by selecting a Material Type to create a new worksheet.
(Create 1 worksheet for each material being disclosed.) 

Step 2 P&G completes the fields highlighted in brown,
and saves the workbook in Excel 97-2003 format. 

Step 3 Supplier completes all fields highlighted in green. 

Step 4 Supplier completes data grids for Intentionally added and Unintentional chemicals

Step 5 Supplier completes all fields for Additional Information

Step 6 Supplier saves the completed workbook and then submits it to P&G.

Notes: Multiple materials may be included in each workbook. Follow steps 1 through 6, submitting the workbook to P&G.

Do Not rename any worksheets created by this application

Procter and Gamble is either currently using, or considering purchasing a material from a supplier for this material our safety and regulatory assessment program requires

Supplier confirms that they have been duly diligent in confirming that all information provided is accurate and will not be changed without first informing Procter and Gamble. Any

Manufacturer Name		
Material Trade Name/Material Product Code		
Document Version # and Date of Completion		
Enter supplier's name, address, location and contact who certifies this document		
Is this material being manufactured in multiple sites?		
Manufacturing site address		
Click to add new manufacturing site address		
Specification Item	Chemical Name	
Intentional Constituents		

Identify each intentional chemical constituent used/created & remaining in the final material. This could include actives, water, emulsifiers, preservatives etc. Insert rows if needed.	
Click to add new Intentional Constituent row	
Unintentional Constituents / Impurities	Chemical Name
Please include all technically expected or measured <u>in addition to those listed in the next column.</u>	Heavy Metal Impurities
	Crystalline silica when relevant (ie, from talc, quartz, silica, mica, etc)
	Asbestos when relevant (ie, talc)
<u>Please include catalyst/s (need to specify), processing aids and unreacted starting materials that may remain in the raw material.</u>	
Click to add new Unintentional Constituent row	

Additional information	<u>Yes/No. Please include details or insert pdf if have been listed in this column, please state expl</u>
Are there any toxicological studies (human or environmental) that have been conducted on this material?	
Has testing of any of the constituents listed in the intentional constituent section above been performed on animals? If yes, identify the constituent in the next column and the date of test.	
If this raw material is or contains a particulate, please provide the particle size distribution.	
If the material is Mica or Talc, please attach crystalline free certification in next column	
If the material is Talc, please attach asbestos free certification in next column

Procter & Gamble

Chemical Assessment Questionnaire Inorganics

Material manufactured by your company or a material made using your material. To be eligible as a material, the material must be used in the production of a Procter and Gamble product. Please complete the questionnaire(s) as the completion of the enclosed questionnaire(s). Your cooperation is highly appreciated.

The information given with and within this document are correct and true, and any change in any of the below information will be brought to the attention of Procter and Gamble.

	P&G MRMS code (if available)			
	P&G IRMS code			
	Manufacturer's Headquarters (Specify Country)			
	Phone			
Is the information provided in this questionnaire applicable to all manufacturing sites?			If NO, please specify	
Address (multiple manufacturing locations)				
Molecular Formula	Chemical Structure (attach file or provide SMILES Notation)	Insert PDF for each component if CAS# is generic with an undefined structure or a polymer where N's are undefined	Constituent Function in the context of this raw material (if drug active etc)	Specify Feedstock if plant or animal derived
			Pick from drop down menu	Pick from Drop down menu

CAS # (if exists)	Other Regulatory identification Numbers (if any)	Specify Region/Country for other regulatory identification number		Max level Expected or measured

Enabling Macros in Excel

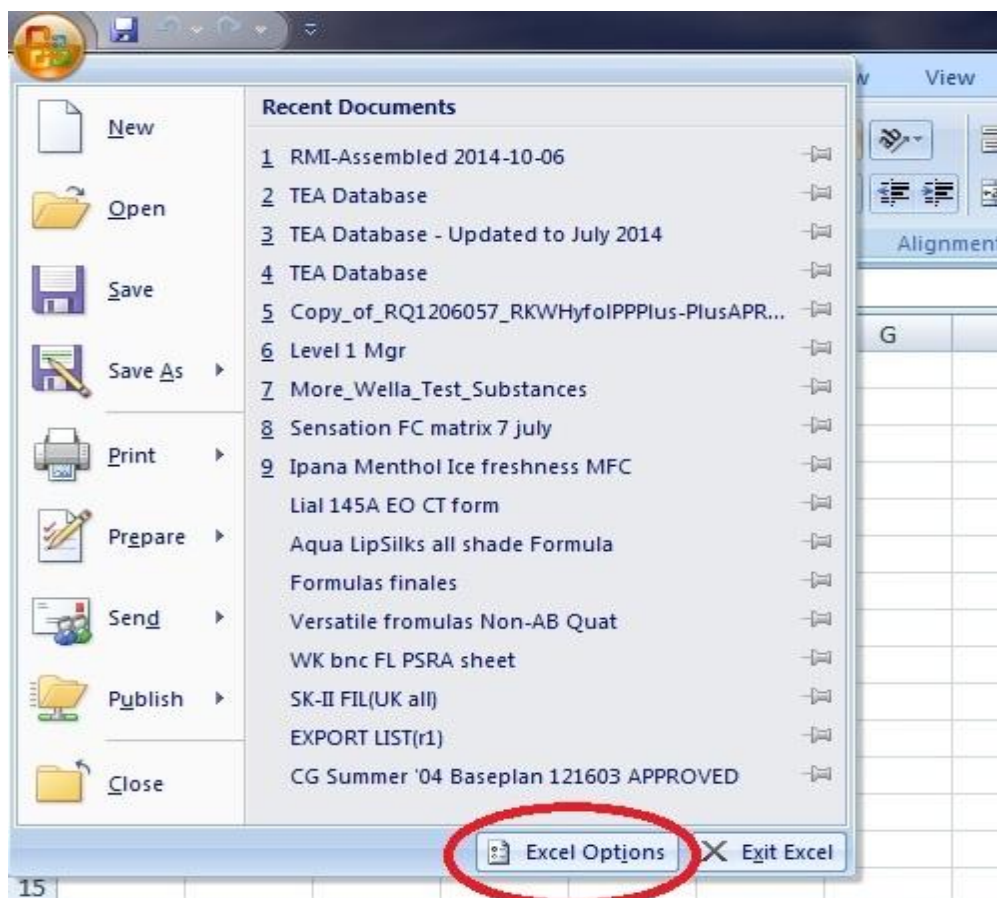

Macros may be enabled globally for all Excel Workbooks, or on an individual workbook by workbook basis. This to explain how to configure each of these options for Excel 2007 and Excel 2010. If you are using an earlier version (97, 2000, XP, 2003) or a version later than 2010, you will need to consult the Excel Help files to determine how to Excel so that macros are enabled.

Enabling Macros for all Workbooks in Excel 2007

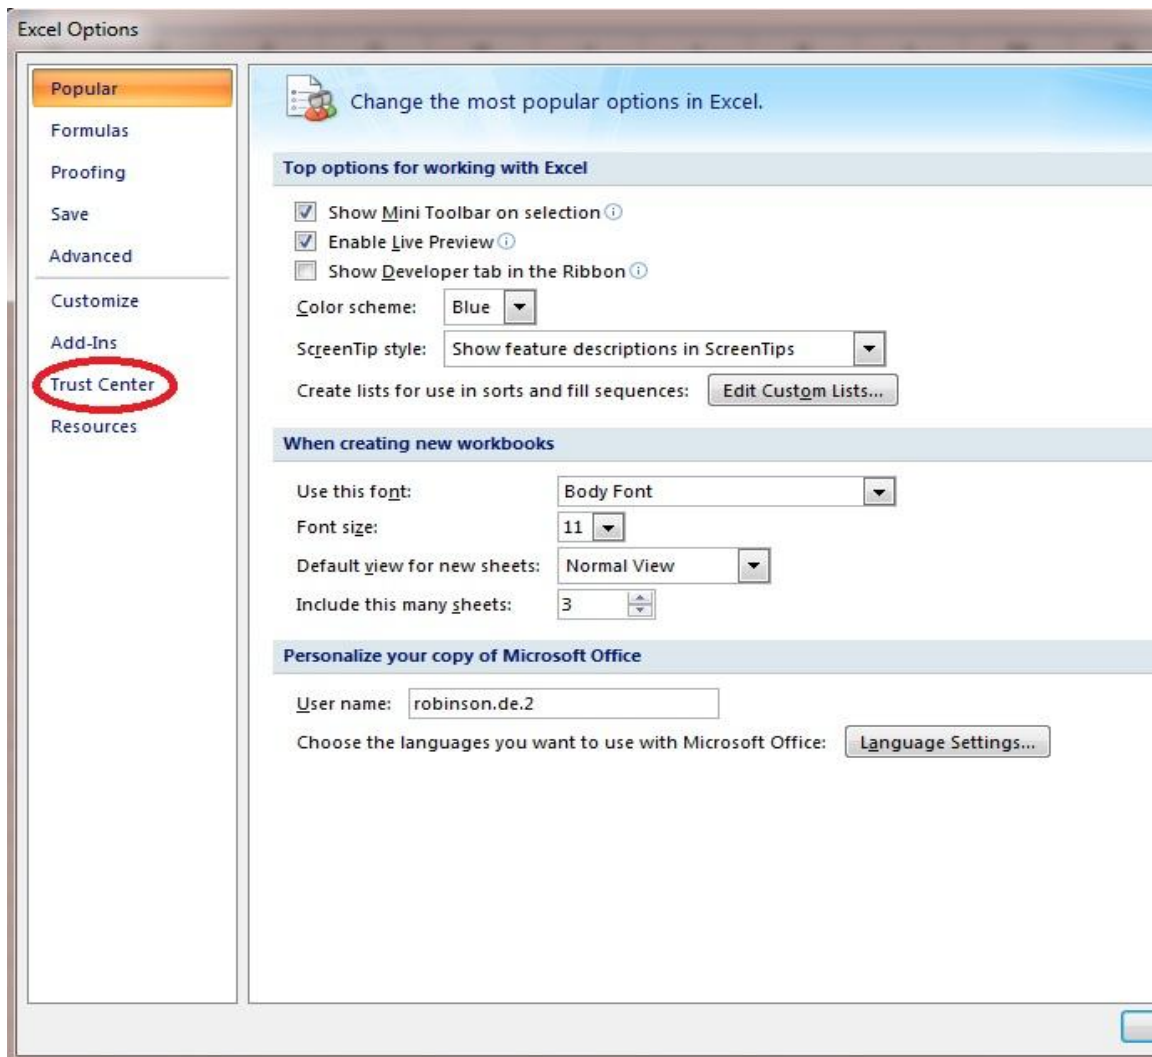

Step 1 With Excel 2007 open, click the Microsoft Office Button as illustrated below. (The procedures for Excel 2010 are nearly identical except that "Excel Options" is a menu choice under the "File" menu.

Step 2 Click on the "Excel Options" button as illustrated below.

Step 3 In the Excel Options dialog box (illustrated below), select the "Trust Center" option.

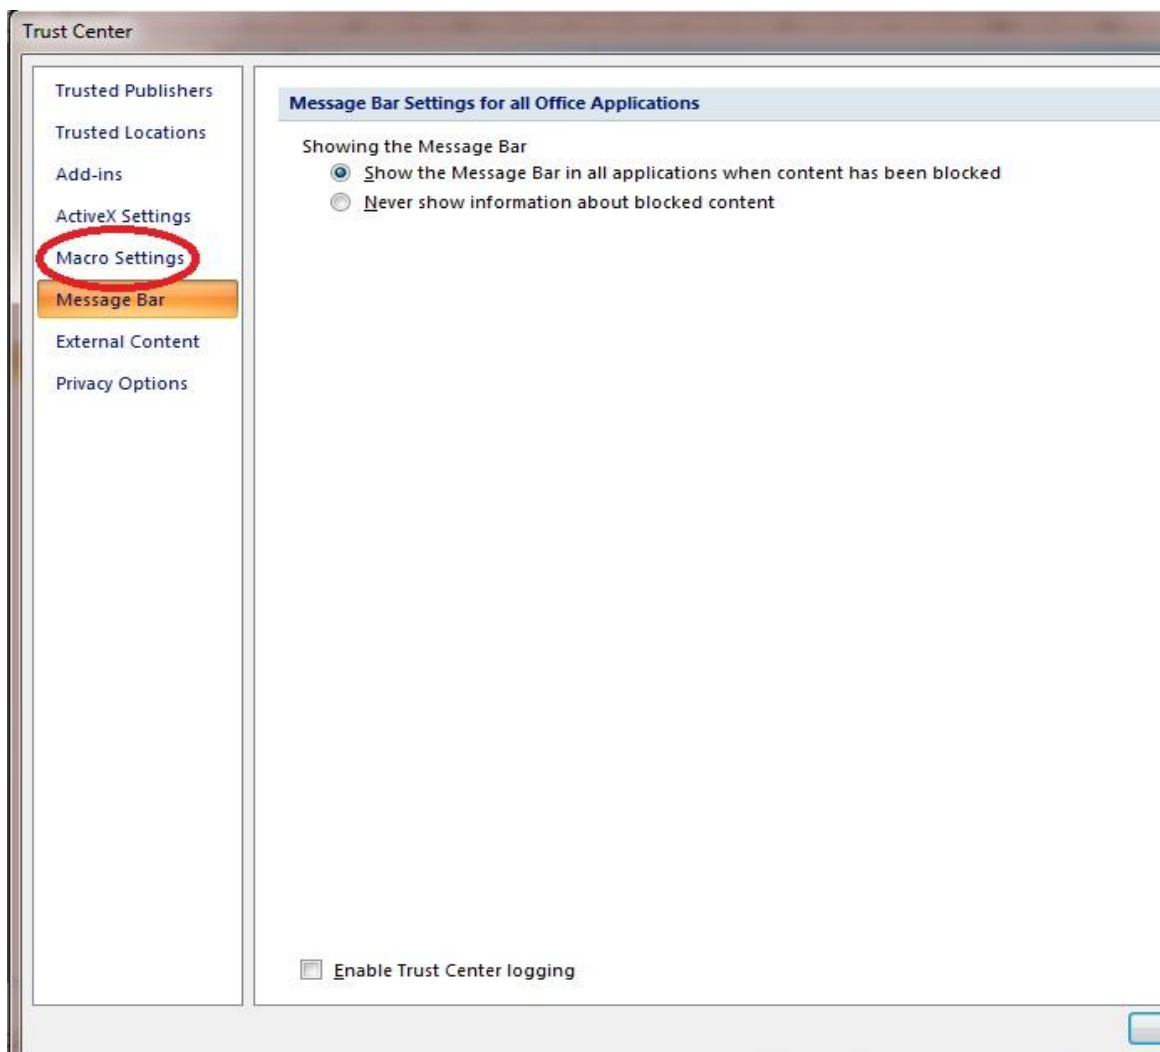

Step 4 Click on the "Trust Center Settings" button that appears (illustrated below).

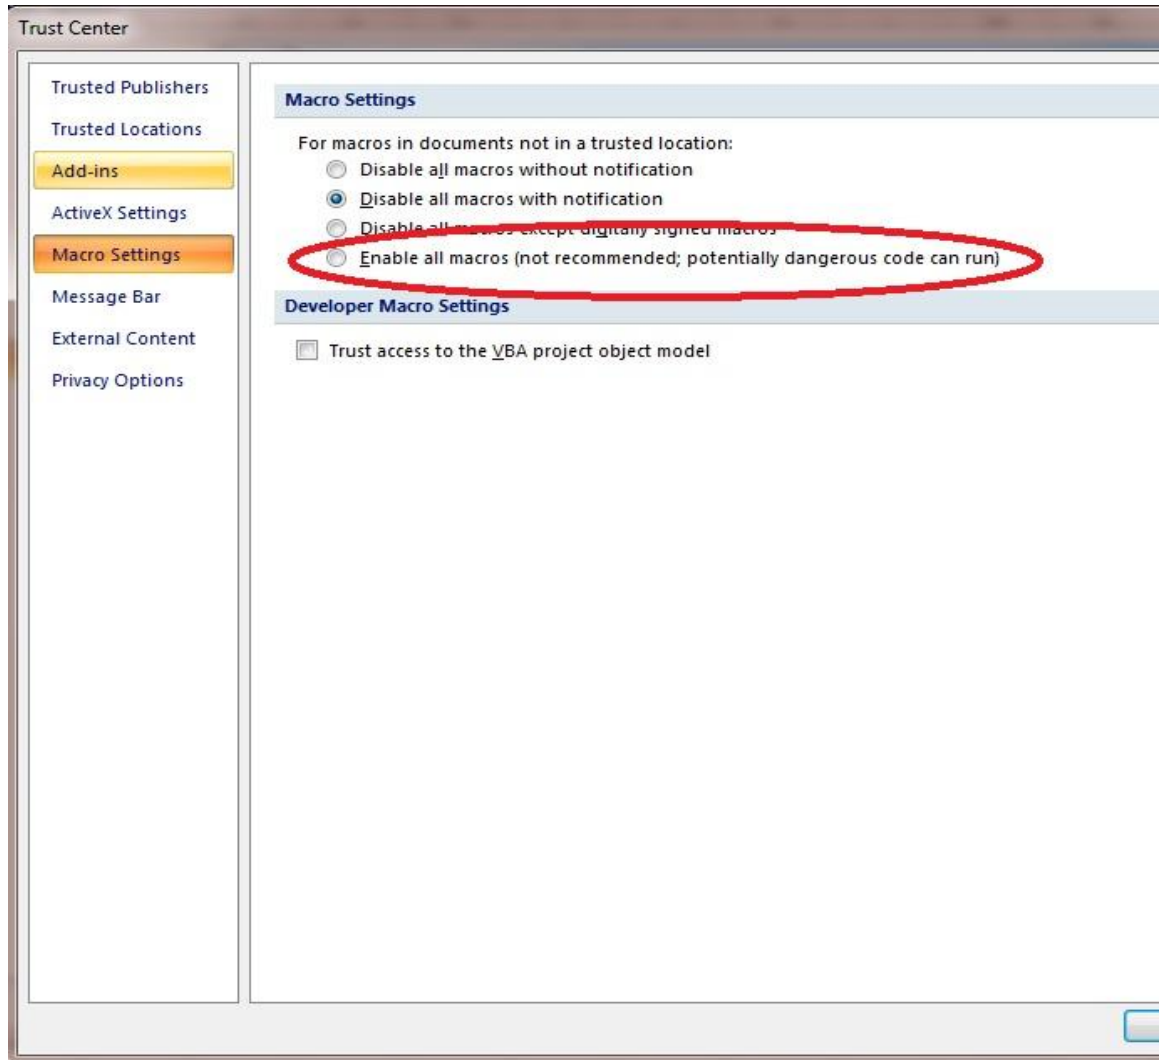

Step 5 Select the "Macro Settings" option in the Trust Center dialog box (illustrated below).

- Step 6** Select the "Enable all macros" option, illustrated below, then click the "OK" button to enable macros in ...

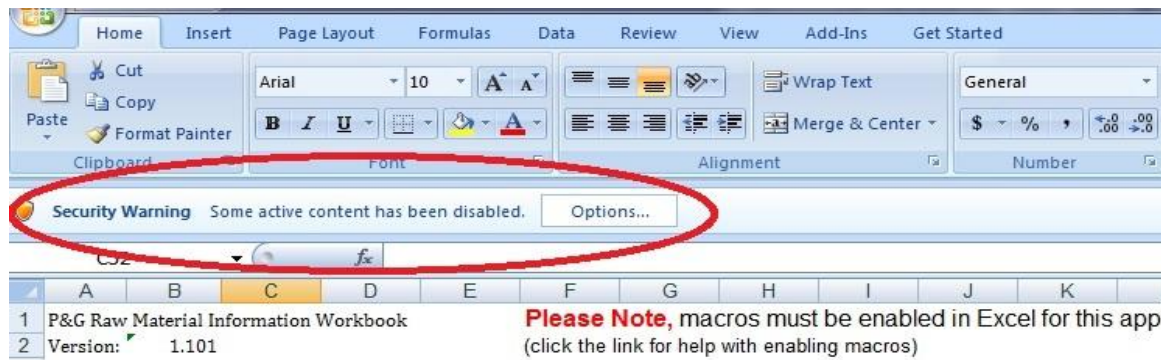

Please Note that enabling macros in all workbooks may violate your corporate policies or expose your computer to rather not accept. If this is the case, please see "Enabling Macros for the Current Workbook in Excel 2007 and Excel 2010".

Enabling Macros for the Current Workbook in Excel 2007 and Excel 2010

- Step 1** Open an Excel workbook that contains macros (identified with the file extension .xlsm in Excel 2007 and older versions of Excel use the .xls extension.)
- Step 2** Look for the Security Warning (illustrated below) immediately above the worksheet that is displayed. Click the "Enable Content" button. (The background color of this warning message will be different in Excel 2010, but the message otherwise be identical.)

Step 3 Select the "Enable this content" in the Security Alert dialog box, as illustrated below.

Please Note for the security warning to appear when a workbook containing macros is opened, the "Disable all macros" option must be selected in the Macro Settings dialog box (illustrated above). Also, it will be necessary to individually enable every macro-enabled workbook that is opened in Excel.
